7th May 2020

## Science With and For Society

Trustworthiness of science information sources (*Italian Science in Society monitor, 2019*)

	Highly/quite trustworthy		Little/Not trustworthy		DK	
	2010	2018	2010	2018	2010	2018
Public lectures by researchers	76,6	81,6	14,4	16,5	9,0	4,7
Popular science magazines	74,3	75,1	18,5	15,2	7,2	6,6
TV science programmes	67,3	71,9	29,7	23,8	3,0	2,3
Radio science programmes	53,5	64,1	29,5	24,2	17,0	8,8
Newspapers' S&T pages	60,6	65,4	34,9	27,6	4,5	6,3
Researchers' blogs	65,2	65,7	19,8	27,9	15,0	6,6

But...

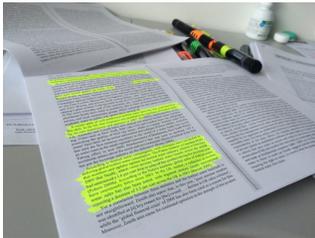

# CONCISE

## The Project

- Almost €1.2 million
- 2 years
- 5 countries
- 9 partners
  - 5 Universities
  - 2 NGOs
  - 2 SMEs

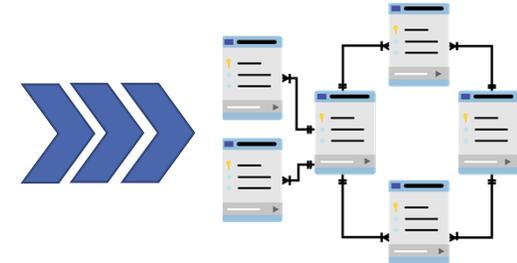

### Literature review

### Public Consultations

### Quantitative and Qualitative Analysis

GA No 824537

7th May 2020

# CONCISE

## Public Consultations

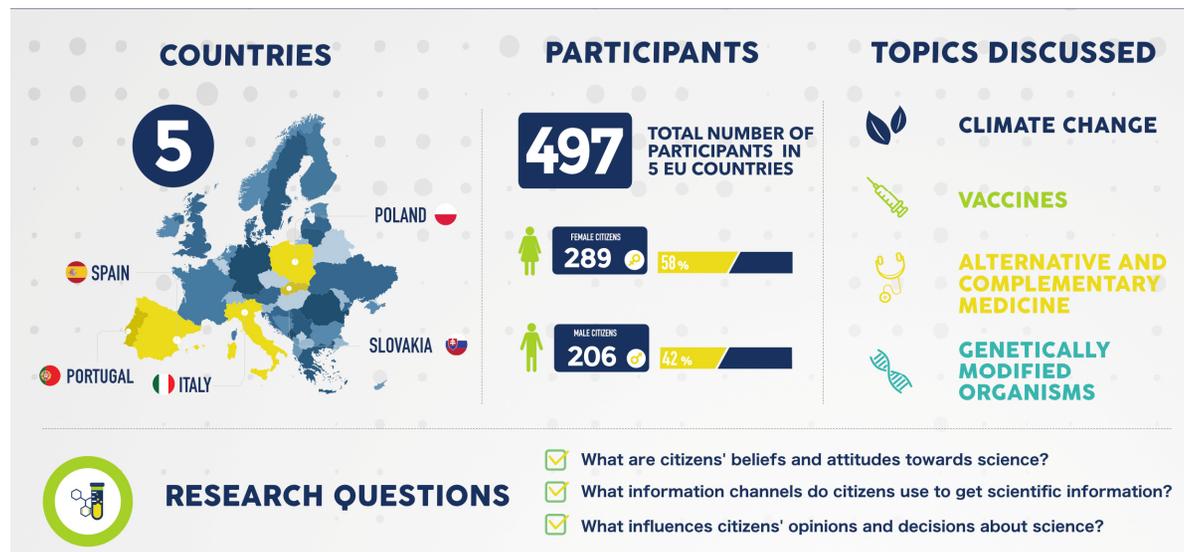

GA No 824537

7th May 2020

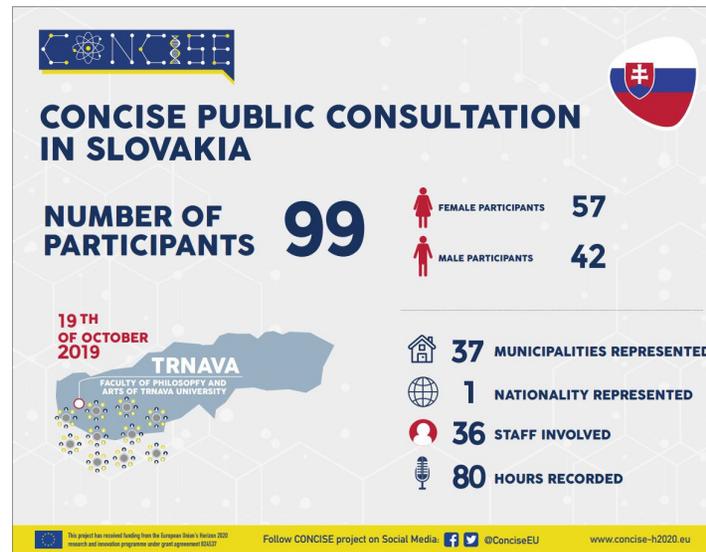

## Public Consultations in Numbers

## Italian Public Consultation

## Slovak Public Consultation

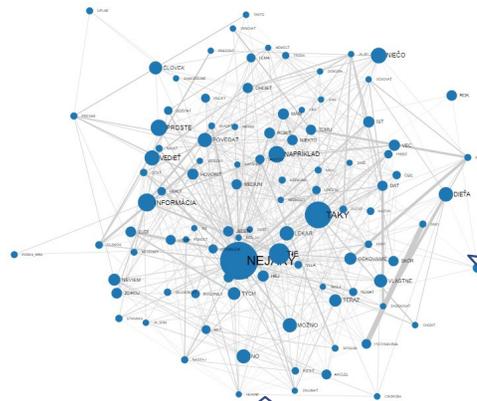

## Preliminary findings of Slovak Qualitative analysis

A base of one's conviction is often own experience

Frequent comparison of the access to information in the former socialist regime and current democratic state

Demand for clear, concise communication from experts and government

Increased number of information require more critical approach from citizens and the reform of the educational system

General trust in medical authorities when in doubt

7th May 2020

## Findings: quantitative analysis

Interpersonal relationship are still relevant for participants:  
speak, watch, search, read and listen are the main verbs cited  
during the discussions

In general, the media role is of  
entertaining stimulating curiosity

When people talk on Public Science Communication  
they are considering Communication as a whole

Medical communication are the most  
relevant for people and expecially the role  
of experts such clinicians are at the centre  
of the debate

GA No 824537

7th May 2020

## Conclusion

Off line and Online domain

Issues does matter  
(GMOs, Vaccines, Cchange, CAM)

Reliability perception:

### Low Awareness:

limited access to  
information processes

### High Awareness:

inadequete  
communication

adequete  
communication

Institution-experts

No misleading,  
authoritativeness
